

First Fruits & Figs Season of Creation for Children's Message "Repentance."

Photos in this PDF show a series of 'wrong' ways to plant a tree, with corresponding 'correct' ways.

On each page, the first photo shows what not to do. The second page not only changes the action to one that will be a good action for the tree and plants, but also the child 'turns' and is facing a different way.

Photo pairs show:

Planting a tree upside down instead of rightside up.

Watering the street instead of watering the berry bushes.

Planting a tree in the middle of a walkway instead of in an open space.

Pouring cola on the tree instead of nourishing it with water.

Planting the tree where it could get stepped on, or even stepping on the tree, instead of planting it in a protected area.
